-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's response filed 7/24/07 has been considered.
2. Claim 5 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4,6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over lesaka 2003/0201982 in view of King et al 6,286,064.

lesaka discloses a keyboard in which a character map of the keys thereon may be changed. The remapped keys may be used to perform any number of functions including output of text, characters, and symbols [0018]. lesaka does not specifically disclose that a series of ambiguous keystrokes will result in "vocabulary". King discloses a keypad in which the ambiguous strokes of keys entered in a sequence produces "vocabulary" (col 3 lines 20-35). It would have been obvious to a person of ordinary skill in the art at the time of the invention to include the "vocabulary" production of King in the output of the remapped keys of lesaka. This would allow for a more rapid entry of common language, or "specific" language into a data processing system.
